Planning the trip of a lifetime?
Don’t let cholera choose your seating arrangements

Cholera is an extremely virulent disease which is caused by ingesting contaminated water or food1 and can result in substantial disruption to travel itineraries or business trips.3

Oral vaccination can help prevent cholera. Taking precautions with food, drinks and personal hygiene can also reduce the risk further. 2 Help protect your travellers from cholera.

Dukoral® cholera vaccine (inactivated, oral) is the only licensed and recommended cholera vaccine in the UK4

Available to order direct from Valneva UK Limited, please visit www.valneva uk.com
